

Vitesse Release Notes for FCP Account Metadata and In-App Hyperlink

This note covers the enhancement release for Vitesse.

Release date: 31st July 2025

Summary of Change

This change is to include Account metadata on a single page within the Vitesse Platform, so that users can easily access it to utilise the information as needed, and to enhance existing reporting.

This change order will:

- Improve the user experience by making account metadata easily accessible to MAS users
- Provide enhanced payment and funding account data to aid better account management
- Enable the production of enhanced reporting using the available data
- Improve user experience and platform synergy by providing direct links from the Vitesse platform to the LIMOSS website

Details of Change

- User should be able to see all metadata fields displayed in a read-only format
- User should be able to access a dedicated Payment and Funding Account metadata page so that they can view account metadata information in one consolidated location.
- User should be able to see the most up-to-date values for metadata fields so that they can rely on the accuracy of the data.
- Where applicable, user should be able to access enhanced reports that includes DCA and Broker details.
- Payment Activity Report has been updated
- User should be able to rely on consistent display of account metadata across the platform so that the metadata page matches the expected value.
- The FCP platform should include useful links that directs the user to the relevant LIMOSS page
- Clicking on any of a link should open a new tab with the relevant page
