

Structured Data Capture Service

User Guide – Lloyd's Brussels Rejections

1. Overview

For Lloyd's Brussels to process risks through their PAS, a number of data items must be present or the whole submission is rejected. To ensure Lloyd's Brussels submissions are successfully processed, SDC performs additional validation checks to ensure the following data items exist in the GPM:

- UMR
- Inception Date
- Premium or EPI (Open Market)
- EPI (Line slips or Binding Authorities)
- Limits
- Underwriter Reference and Lloyd's Risk Codes
- Brokerage

If one or more of these data elements are missing then the submission is marked as "LB Rejected" in the SDC Portal, and an email notification is sent to the submitting organisation. The extracted data will not be sent to Lloyd's Brussels, or the submitting carrier, until the data has been corrected.

Carriers need to log on to the SDC Portal and either enter the missing data, or reject the submission and resubmit a corrected version to SDC via the normal channels.

This only applies to submitted documents that contain Lloyd's Brussels stamps.

NOTE: Uncorrected items will be submitted to Brussels with the errors if not corrected within 30 days.

2. LBS Rejection Email

If the submitted document is processed successfully by SDC, but is missing any of data elements required by Lloyd's Brussels, the submission will be marked as "LB Rejected" in the SDC portal an email will be generated :

From: SDC SYSTEST ADMINISTRATOR [mailto:sdc@sdc-service-test.com]
Sent: 07 August 2019 12:32
To: Kirton, John; Carrier LB Admin>
Subject: SYS - SDC Request [WEB0000018978] - Carrier ref [MRC0000234] - LB Rejection

-- Caution: Don't open attachments or click on links unless you're absolutely sure that you know who the sender is. --

Dear Sir/Madam

Unfortunately, your submission WEB0000018978 to the SDC Service has been rejected by Lloyd's Brussels as it does not contain the minimum data to support the LBS System.

The following data item/s are missing or invalid:

- **UMR**
- **Inception date**

Please log into the SDC Portal to add this information. Click [here](#) to be taken to the Portal.

Alternatively, please resubmit a corrected document.

Please contact sdc.servicedesk@webconnectivity.uk with any queries.

Regards
SDC Team

- The email is sent to the submitting user and the designated administrator for LB rejections. PPL and submissions via ACORD will be sent to the designated administrator only
- Contain your carrier reference and the SDC submission ID
- A list of the missing data items
- A Link to the SDC Portal

3. SDC Portal – Transaction List

- If a submission fails the Lloyd’s Brussels validation it will be coloured orange in the SDC Portal and the Status set to “LB Rejected”.
- The data items that failed the validation will be shown in the **Rejection Reason**
- The carrier needs to either
 - Correct the data and reprocess the submission or
 - Reject the submission and submit a new corrected version of the document
- To do this, select the “**LB Reprocess/Reject**” button

4. SDC Portal – Lloyd's Brussels Data Update page

On the **Lloyd's Brussels Data Update** page, the following options are available: -

- **Reprocess** - enter the missing data and reprocess the submission - this will validate the changes and send the data/GPM to Lloyd's Brussels
- **Reject** – fully Reject the submission. A reason of '**LBS Submission Rejected by Carrier**' will be allocated to the item
- **View Original MRC** – open the MRC document in another tab
- **Cancel** - cancels the update and returns to View Transactions page – note that any changes will **not** be saved
- **View Details** – opens a new tab and displays the original GPM and CSV data files

Should you experience any technical difficulties or challenges using the service please contact:

<https://limoss.haloitsm.com/portal/>

T: 0207 100 5151

09.00 – 17.30 Monday to Friday (apart from UK public holidays)

The background is a solid blue color. It is decorated with a repeating pattern of diagonal lines in white and light blue, and L-shaped icons in orange. The L-shaped icons are positioned at the intersections of the diagonal lines.

LIMOSS

An orange arrow originates from the bottom of the letter 'I' in 'LIMOSS'. It points vertically upwards to the top of the 'I', then turns 90 degrees to the right and extends horizontally across the width of the word.
