

Vitesse Release Notes for FCP Financials Overview Report Update

This note covers enhancements to the FCP Financials Overview Report delivered by Vitesse.

Release date: 01 October 2026

Summary of Change

The FCP Financials Overview Report has been updated to show life-to-date data at the Syndicate Share reporting level and to include Non-Cash Signing data integrated from Velonetic.

Details of Change

The enhancements include:

- Reporting level: The report provides a life-to-date view of funds and claims throughout the FCP lifecycle by UMR, Year of Account, Syndicate Share, and Funding Account Currency.
- Non-Cash Signing data integration: Data is now received directly through integration with Velonetic. Managing Agents no longer need to submit Non-Cash Signing files manually.

Actions Required

- Existing users: Create a new reporting template before running your Financials Overview Report, as the existing template is being removed.
- New users: Request access through the FCP support mailbox or your Vitesse Relationship Manager. Once access is granted, create a reporting subscription to receive the report on an ongoing basis.
